Professional Land Surveying Services

1809 22nd Street SW Willmar, MN 56201

Phone (320) 231-2844 Fax (320) 231-2827

NOTICE: SURVEYORS ARE WORKING ON OR NEAR YOUR PROPERTY.

Bonnema Surveys Inc. may need to enter onto your property for the purpose of doing surveying work. Please do not be alarmed. We have been hired to do a survey for one of your neighbors and we will be careful not to damage your crops or real estate. Please consider this letter as your notice that we may be entering your land in the near future. In rural Minnesota, it is becoming increasingly difficult to find residents at home during the day, so you may have found this notice attached to your door.

As part of the survey work, we will be conducting a thorough search in an effort to recover the original location of the section corners placed by the government 130 years ago. We will also be doing a lot of measuring for the purpose of comparing current distances to the dimensions noted 130 years ago. Our work is typically focused at or near the locations where we expect to find evidence of these section corners, and may include old fence lines, or land use lines.

If you have a need for any property surveying, now is a great opportunity to get it done because we are currently working in your neighborhood.

If you desire to speak with us about surveying, or if you have any concerns about this notice, please contact us at:

Minnesota Statutes

Section: 505.31

Text: 505.31 Entry upon land; notice.

It is lawful for any surveyor to enter upon any land for the purpose of locating existing survey or reference monuments or landmarks, provided, however, such surveyor shall be responsible to the landowner for any and all damages as a result of such entry, and no surveyor may enter upon any land unless first notifying the owner or occupant of the intended entry for such purpose.
